In so far as individual magic is concerned, it seems that its practice among the Mbuti, when taken over from the villager, is of no more significance than our own superstitious crossing of the fingers, touching of wood, or avoidance of walking under ladders. When Pygmies call in villager specialists to perform magic for them, mainly to improve hunting, we have at least to consider the possibility of a mere political maneuver.

Dance and Festivity

Villagers and Pygmies associate frequently at festive seasons or occasions. Pygmies will attend any village festival, and when they have an occasion of their own (such as the killing of an elephant) they first celebrate in their forest camp, then break camp and continue their celebrations in the village.

Dance is an important feature of any celebration, villager or Pygmy, but in this the two never mix. They watch each other's dances with enjoyment, but take part only in fun. One ex-

the major aspects of life in the initiation camp, including some of the ordeals. They not only knew the initiation songs, but were taught them by their mothers, who even more than their uninitiated male children were supposed to be in complete ignorance of such matters.

When the *ganza* moved to the forest, the instructors did not come with them, and the *ganza* had only occasional visits from one villager who stayed in the nearby Mbuti hunting camp. There were no ordeals during this time, no singing except when visited by the solitary villager, and no other form of instruction by the Pygmies to replace that of the villagers. The boys did not accompany the hunt. It seemed to be, for both children and the adult members of the *ganza*, a holiday camp, free from the rigors of the initiation school.

But if the Mbuti showed no respect for the ceremonial or ritual significance of the *nkumbi*, they could scarcely avoid respecting the physical discipline imposed by the various ordeals they had to undergo. This was a frequent topic

or dry, with few real ups and downs that affect the life of the group as a whole.

Occasionally an elephant is killed, and that means the entire camp will be abandoned at once and a new one built around the dead animal, so that it can be eaten on the spot. The Pygmies point out that this is easier than bringing the elephant to the camp. It means a week of merry-making, of singing and dancing and no hunting. The only trouble is that it also means visits from the villagers. On such occasions they will pluck up their courage and venture into the forest, feeling that with such an abundance of meat the Pygmies will be in a generous frame of mind. The Pygmies try to avoid this by immediately sending meat to the village. But when villagers do come, they are generally courteously received and allowed to stay for a day or two. After that, if they are slow with gifts of rice or tobacco, the Pygmies have various ways of making them move on. The forest is the world of the Pygmy, and he is not bashful about telling a villager who outstays his welcome just what he thinks of him.

I stayed in one camp which was only a few hours from the village and on the way to a Negro fishing ground. We were constantly beset by villagers passing through, and after a while the Pygmies got tired of feeding them, tired of being used as a convenient stopping place. So when they were asked for food, the Pygmies would agree on condition that the villagers join them in a game of *panda*. This is a gambling game in which beans are thrown on a mat, or on a flat piece of ground. Some of them are quickly scooped up by one of the two players. The other, looking to see how many are left, has to estimate at a glance how many his opponent has taken. He then tells his opponent to throw down one, two, or three beans, or to stay as he is. The count is then made—also at a glance—and if the player has an exact multiple of four he wins. But against villagers Pygmies always win. For one thing they have an uncanny sense of

sobbed her heart out—probably for the first time in her wonderful, hard-bitten old life.

The days that followed were full of happiness for everyone. Once Lizabeti got over her fright I made her practice regularly, to give her more strength in her good leg. She was soon able to stand up by herself, using the crutches for a lever. Not once did she fall. And the other children cut themselves crutches so that they could join in the fun, and together they found a new world of delight. When I was not coaxing Lizabeti to use her crutches more and more, someone else was, for everyone was anxious to see her fly over the ground just like Kenge, who by now was a master acrobat on his crutches, from which he refused to be parted.

In other respects, however, the camp became less pleasant, at any rate for me. The bees began to come in droves after their stolen honey. All day long they buzzed angrily around, so that we kept smoky fires in our huts night and day.

Almost every hour someone returned from a secret forage, with leaf bundles tied to his belt, dripping the sticky liquid down his legs. Sometimes it was too liquefied to be eaten, and then the whole bundle was simply dipped into a bowl of clear forest water, making a sweet-tasting drink. But far more popular was the whole comb which could be eaten grubs, larvae, bees and all. If it was very hard, it was first softened over the fire, and this made the grubs squirm more actively so that the honey worked its own way down your throat. It was, however, the best-tasting honey of all, despite the insects.

Apuma was yet another kind of honey, which came later in the season. It was full of grubs too, but they were all dead, and the honey had fermented. It was made by a different kind of bee and tasted like a bitter liqueur; if eaten in any quantity it could be highly intoxicating. But the Pygmy needs no stimulant in the honey season. He is drunk with the forest, with its beauty and abundance, and with the love it showers on its people. Every night that tiny

camp resounded to songs of joy and praise, accompanied by the ringing of the ngbengbe sticks as they were clapped together in complex cross rhythms by boys and girls alike. Every night Masisi told his group, which had steadily grown ever since the beginning, stories about the past. And every night we went to bed content, knowing that the morrow would be even better; for each day we discovered fresh growths of mushrooms, trees full of different kinds of nuts, and each night the chameleon gave its long, sad cry, to tell us that on the morrow we would have more honey.

One night in particular will always live for me, because that night I think I learned just how far away we civilized human beings have drifted from reality. The moon was full, so the dancing had gone on for longer than usual. Just before going to sleep I was standing outside my hut when I heard a curious noise from the nearby children's bopi. This surprised me, because at nighttime the Pygmies generally never set foot outside the main camp. I wandered over to see what it was.

There, in the tiny clearing, splashed with silver, was the sophisticated Kenge, clad in bark cloth, adorned with leaves, with a flower stuck in his hair. He was all alone, dancing around and singing softly to himself as he gazed up at the treetops.

Now Kenge was the biggest flirt for miles, so, after watching a while, I came into the clearing and asked, jokingly, why he was dancing alone. He stopped, turned slowly around and looked at me as though I was the biggest fool he had ever seen; and he was plainly surprised by my stupidity.

"But I'm *not* dancing alone," he said. "I am dancing with the forest, dancing with the moon." Then, with the utmost unconcern, he ignored me and continued his dance of love and life.

As the weeks went by, however, a note of dissatisfaction stirred in the camp. Masisi began to complain that the others, including Manyalibo, were way off to the north getting meat, yet they had
